PERSONAL INFORMATION

I am a pixel perfect Frontend Developer. I write well scalable, testable, reusable code using the best software development practices. I believe my superpower is translating UI/UX designs to actual code at a very fast speed, with responsive, user-friendly result. I possess over 2 years ⬈ hands-on experience as a Frontend Developer of efficiently coding websites and web applications using modern technologies. Keen eyes for good design, user experience and good work ethic. Excellent in teamwork via collaborations with back-end developers and designers. Outstanding Problem-solving skills with the ability to use analytical and creative thinking in debugging

REFEREES

Available on Request

and finding solutions. I write React.js conveniently.
